

RETINA australia

WEBINAR SERIES 2020 - 2021

Genetic analysis and how this can help patient management and the development of therapies for inherited retinal diseases.

Date: Thursday 13th August

Time: 1.00pm EST (12.30pm in SA/NT and 11.00am in WA)

Cost: Free for current Retina Australia members
\$15 for non-members

Presenters:

Dr John De Roach, Principal Investigator, Australian Inherited Retinal Disease Registry and Gene Bank, along with colleagues Ms Terri McLaren and Dr Tina Lamey, will speak on:

- the activities of and outcomes from the Australian Inherited Retinal Disease Registry and DNA Bank.
- the research genetic reports we provide to participants' ophthalmologists, and how they are changing patient management.
- the latest research into therapies for inherited retinal disease, including gene-specific clinical trials and personalised medicine.

To reserve a place at this event, or if you would like more information about how webinars work, simply send an email with your name and contact details to info@retinaaustralia.com.au, or phone and leave a message at 03-9650 5088, and we will contact you with the sign in details when they become available.
